

# YAK BACKPACK

Large capacity and heavy loads backpack, with one single big container of 65L for general material transportation that can be set up in our unique water hose unfolding mode.

## SPECIFICATIONS

Dimensions	65 x 40 x 20 cm
Total capacity	65 L
Empty weight	1,6 Kg
Compatibility	Max. x4 25m hoose

## COMMON FEATURES

- Exterior layers made of high resistance 1000D polyamide.
- Adjustable hip belt with high-resistance YKK buckle, with standard Molle system on its sides to attach additional hip pouches.
- Ergonomic back panel with breathable 3D mesh and closed cell PE padding for a better comfort.
- Shoulder pulling straps for better handling of heavy weights during transportation.
- Sternum strap adjustable in height and length, with integrated rescue whistle buckle.
- Adjustable shoulder straps with breathable 3D mesh and closed cell PE padding for a better comfort.
- Additional webbing for accessory attachment.
- High reflection vinyl (EN 20471) for branding.

## SPECIFIC FEATURES

- 65-liter container with top-to-bottom parallel zippers for a quick and easy access to the material.
- Zipped bottom opening to set up the container as hose carrier.
- It fits up to 4 hoses of 25m thanks to its hose carriers (hose capacity depends on hose type)
- Side pockets with long zipper and safety snap button for easy access to hose ends, without taking the backpack off.
- Exterior buckled straps to carry unfolded water hoses.
